During the course of this one day conference we will discuss the interdisciplinary approach which we have developed at King’s College Hospital, how it has evolved, how it works and what our outcomes are. The day focuses on functional recovery after brain injury and how challenges to recovery are addressed by the MDT in the acute setting.

**Key themes include:**

- Day to day function in the real world
- Social engagement
- Outcomes
- Re-integration

The conference is intended for those who work with or have an interest in children and young people in the early stages of recovery and rehabilitation after acquired brain injury.

The presentations will be given by a range of disciplines including speech and language therapy, occupational therapy, physiotherapy, psychology, specialist nursing and medical specialists in neurorehabilitation as well as patients and their families.

**Date:** 7th November 2016; 9:00 to 17:00.

**Venue:** Windsor Walk Lecture Theatre, Fetal Medicine Research Institute, 16-20 Windsor Walk, SE5 8BB (next to Denmark Hill Train Station)
